# Lawn Grass Seeds

Making a lawn is a job that most of us only have to undertake once or twice in a life-time. We build lawns for permanence, and for that reason we **SHOULD** go about it with the utmost care. The soil should be carefully prepared before planting the seed.

It requires about 10 pounds of Blue Grass seed to 1,000 square feet (Bent seed about 5 pounds). Fertilize with a good commercial fertilizer such as Vigoro, Sacco, Ivy, Milorganite or Loma, using 100 pounds to 2,500 square feet, and cover with Peat Moss. (1 bale covers about 1,000 square feet.)

**SHEEP MANURE** is very good, as it contains some **HUMUS** and is especially good to mix in your vegetable garden soil. 100 pounds covers about 500 square feet. You can make a good liquid manure by mixing one pound of Sheep Manure with five gallons of water.

We are always pleased to help you with your lawn problems.

These prices are **NOT PREPAID**. If wanted by mail, include postage at the regular zone rates. **NO SALES TAX ON SEEDS.**

## KITTY LITTER?

Kitty Litter is a specially processed material which provides a new and better solution to a problem confronted by owners of cats. It does away with the daily, unpleasant "messy sand box routine." Unlike sand, it dries and deodorizes.

You will find it much more economical to use than sand; it need not be changed every day, so you will find it substantially lower in cost. We suggest a Kitty box or pan 15 or 16 inches in diameter. At the end of every

other day you will see that the droppings have dried so thoroughly that they can be removed with a piece of tissue and disposed of easily. 5 lbs. 70c; 10 lbs. \$1.30; 25 lbs. \$3.00; 50 lbs. \$5.50.
